Dear Colleague

Welcome to our June nutritional update for practitioners. The aim of this regular news update is to keep you up-to-date with research findings from the nutritional industry, launch of new products and special offers from Pure Bio Ltd, and to help keep you abreast of products available for your patients and when & how to use them.

In this issue

- [Latest research on toxic sunscreens](#)
- [Common antibiotic may cause nerve damage](#)
- [Product Focus - Pycnogenol - important quality of life benefits](#)
- [Latest Pure Bio News - Sale - HUGE SAVINGS!](#)
- [Forthcoming Seminars - The *NEWLY FORMATTED* Fundamentals of Applied Kinesiology.](#)
- [Pure Bio Gift Vouchers](#)
- [Quote of the Month](#)
- [How to Find Us](#)

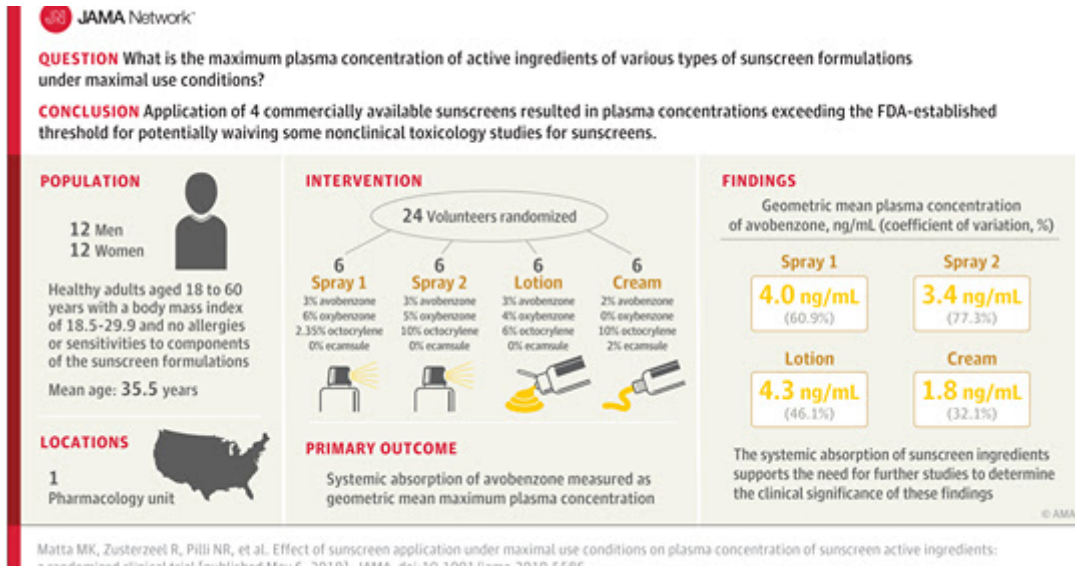

Featured Articles

[TOXIC EFFECT OF SUNSCREEN APPLICATION ON PLASMA CONCENTRATION](#)

ACTIVE INGREDIENTS IN MANY CHEMICAL SUNSCREENS HAVE TOXIC LEVELS OF SYSTEMIC ABSORPTION - in this study, 24 people applied randomly different sunscreen 4 times daily for four days and blood samples were evaluated.

The FDA has provided guidance that sunscreen active ingredients with systemic absorption greater than 0.5 ng/mL should undergo toxicology assessment, including systemic carcinogenicity and additional developmental and reproductive studies.

In this study, systemic concentrations greater than 0.5 ng/mL were reached for all 4 products after 4 applications on day 1. The average peak oxybenzone level was around 200 ng/mL - that's 400 times higher than the level to trigger a formal toxicology review.

This randomised clinical trial recruited healthy volunteers to assess whether the active ingredients of commercially available sunscreen products (avobenzone, oxybenzone, octocrylene and ecamsule) are absorbed into systemic circulation under maximal use conditions.

COMMON ANTIBIOTIC MAY INCREASE NERVE DAMAGE

Research from the University of Dundee has shown that a commonly used class of antibiotics may increase a risk of suffering a serious and potentially permanent form of nerve damage by almost 50%

Product Focus

PYCNOGENOL - IMPORTANT QUALITY OF LIFE BENEFITS

Pycnogenol is a patented extract of maritime pine bark, sustainably harvested from trees grown in the South West of France. It contains nutrients which are lacking in most diets - bioflavonoids.

More than 50 years of scientific research have proven the efficacy of Pycnogenol in over 300 studies, which have shown a great variety of benefits of the natural Bark extract on human health.

Pycnogenol helps to maintain cellular health by protecting our cells against aggressive free radicals and reducing damage caused by them. This slows down the cellular ageing process in our body, which can increase cellular longevity and protect against the development of age-related diseases.

Pycnogenol can also help strengthen your immune system and provide protection against a range of xenobiotics. It helps to maintain good vitality, increases physical strength and cognitive & mental health.

Forthcoming Seminars

New Seminars for 2019/20

[ICAK-UK presents:](#)

The ***NEWLY FORMATTED*** Fundamentals of Applied Kinesiology - a FIVE-WEEKEND accredited Course of foundational material, approved by the International College of Applied Kinesiology - ICAK.

WHEN: COMMENCES SEPTEMBER 2019

VENUE: GATWICK HILTON HOTEL, SOUTH TERMINAL, GATWICK AIRPORT

LECTURER: TRACY S GATES, DO, DIBAK

This course is an exciting new opportunity to learn the fundamentals of Applied Kinesiology (AK). The course focuses initially on muscle testing skills and builds on a monthly basis to look at all aspects of visceral, metabolic and stomatognathic dysfunction. The course will allow you to integrate AK easily and progressively into your existing practice.

Click [here](#) for full details and booking form.

(please note that these courses are only open to practitioners with a minimum 3-year undergraduate degree in a medically oriented profession, eg medical doctor, dentist, chiropractor, osteopath, physiotherapist, etc)
