[**TUMOURS PARTIALLY DESTROYED WITH SOUND DON'T COME BACK**](#)

Non-invasive sound technology developed at the University of Michigan breaks down liver tumours in rats, kills cancer cells and spurs the immune system to prevent further spread - an advance that could lead to improved cancer outcomes in humans.

By destroying 50% to 75% of liver tumour volume, the rats' immune systems were able to clear away the rest, with no evidence of recurrence or metastases in more than 80% of animals.

The treatment, called histotripsy, non-invasively focuses ultrasound waves to mechanically destroy target tissue with millimetre precision. The relatively new technique is currently being used in a human liver cancer trial in the United States and Europe.

HUMAN GUT-IN-A-DISH MODEL HELPS DEFINE 'LEAKY GUT' AND OUTLINE A PATHWAY TO TREATMENT

NEW PRODUCT LAUNCH

EPI-INTEGRITY POWDER

We are pleased to announce the launch of a new Pure Encapsulations product - [Epi-Integrity Powder 171g](#).

Epi-Integrity provides a unique broad-spectrum combination of glutamine, prebiotics and targeted botanicals, mixed in a natural strawberry-lemonade flavoured powder.

The product features clinically studied Nutrigut® Perilla (Perilla frutescens) leaf extract. Perilla frutescens is a good source of polyunsaturated fatty acids (PUFAs), important in the prevention of inflammatory and cardiovascular diseases. Perilla also contains different polyphenols that have an antioxidant effect in the body.

Arabinogalactan resists digestion in the stomach and small intestine. This allows it to reach the large intestine, where it serves as a prebiotic fibre for beneficial gut bacteria.

Epi-Integrity also contains astragalus and deglycyrrhizinated licorice (DGL) extracts.

This product is:

- **Free from wheat, gluten, dairy and soy**
- **GMO free**
- **Suitable for vegetarians & vegans**
